PROJECTS

Project 1: Anime Bootcamp

- **Description:** A full-stack web application for anime fans to search for anime titles and create personal watchlists. Users can rate and comment on anime, as well as view recommendations based on their watch history.
- **Technologies Used:** HTML, CSS, JavaScript, Node.js, React.js, Express.js, MongoDB, Passport.js, Bootstrap

Project 2: Cost of Living Project

- **Description:** A web application that allows users to compare the cost of living in different cities based on their income and expenses. The app provides a breakdown of expenses such as housing, transportation, and food.
- **Technologies Used:** HTML, CSS, JavaScript, Node.js, Express.js, PostgreSQL, Sequelize, EJS, Bootstrap

Project 3: Online Library

- **Description:** A full-stack web application that allows users to search for and borrow books from an online library. The app includes user authentication and authorization, as well as the ability to reserve and borrow books.
- **Technologies Used:** HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, Mongoose, Passport.js, EJS, Bootstrap
